Shades of Gray™ Display Technology

No Shades

With 256 Shades

COMPLETE CONTROL. Use Shades of Gray™ with Fair-Play's ProLine® software controller to combine graphics, animations and text into a multimedia presentation. ProLine's Windows®-based software enables you to collect and overlay common graphic and movie file formats—even video—on large displays. Create reels of player statistics, run game video or schedule sponsor advertising. With Shades of Gray and ProLine, you have the power to create a unique presentation of fresh content that will hold your audience's attention.

Capture your fans' attention using 3-D graphics with superior depth and exceptional image quality with Shades of Gray™.

ENGAGING TEXT AND EFFECTS.

Import your custom files from common computer design applications or use ProLine software to design your messages. Shades of Gray enhances your messages to deliver a powerful punch. Bring out key words with bold, bright light levels. Amplify your messages and maximize the impact of text effects with enhancements such as drop shadows and shading. Use effects like *fade*, *sparkle*, and *snow* to enhance single-color text and graphics.
